

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION V

1450 MARIA LANE, SUITE 210
WALNUT CREEK, CALIFORNIA 94596

JUL 8 1991

Docket No. 50-344

License No. NPF-1

Portland General Electric Company
121 S.W. Salmon Street
Portland, Oregon 97204

Attention: Mr. James E. Cross
Vice President, Nuclear

SUBJECT: NOTICE OF VIOLATION
INSPECTION REPORT NOs. 50-344/90-200 and 50-344/91-201

This refers to a Nuclear Regulatory Commission (NRC) Electrical Distribution System Functional Inspection (EDSFI) and follow-up inspection conducted at the Trojan Nuclear Plant from July 23 through August 31, 1990 and from March 18 through March 22, 1991, respectively. Exit meetings were held on August 31, 1990, and March 22, 1991, to discuss the findings with members of your staff.

Based on the results of the initial and follow-up EDSFI inspections, it appears that several of your activities were not conducted in full compliance with NRC requirements, as set forth in the enclosed Notice of Violation.

The teams found that, in general, your electrical distribution system will perform its intended safety function under design basis conditions; however, as identified in Inspection Reports 50-344/90-200 and 50-344/91-201, engineering and technical support require further attention and improvement. In particular, the enclosed Notice of Violation emphasizes the need for significant improvement in your timely evaluation and correction of potentially safety significant deficiencies.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosures will be placed in the NRC Public Document Room.

The responses directed by this letter and the attached Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Pub. L. No. 96-511.

Should you have any questions concerning this inspection, we will be glad to discuss them with you.

Sincerely,

D. Kirsch, Chief
Reactor Safety Branch
