Mr. Larry Bell
Department of Low Level Waste
Management and Decommissioning
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Bell:

I am writing in response to your request of George Durfee that we obtain written authority from GZA GeoEnvironmental, Inc. to permit NRC to reproduce certain GZA copyrighted material and to permit public access to such material. The material in question is a document entitled, "Hydrogeologic Study, WYMAN-GORDON COMPANY, NORTH GRAFTON/MILLBURY, MASSACHUSETTS" and is dated June 1985. I have spoken to Frank Clark at GZA and obtained his consent, on behalf of GZA, to your request. Since GZA receives similar requests fairly often they have developed a standard form of written consent which I am forwarding to you with this letter. I trust that it will be satisfactory for your purposes.

Wyman-Gordon Company, of course, also consents to NRC reproducing the above-referenced report and including it in NRC's file room.

If you have any questions regarding the above, please feel free to call me directly.

Very truly yours,

Jeremy F. Swett
Corporate Counsel

RE: Use of information
Radiological Evaluation

Dear Mr. Swett

Responding to our telephone conversation earlier this week, it is GZA's understanding that Wyman-Gordon Co. has forwarded certain plans from our environmental reports to the Nuclear Regulatory Commission (NRC) for use in their studies of the site. These plans may contain copyrights which are intended to prevent their unauthorized re-use by others.

GZA hereby authorizes Wyman-Gordon Co. and the NRC to reproduce our plans for the purpose of evaluating environmental conditions at the site and vicinity, with the stipulation that proper reference be given to the source of the information. The user should also note that the plans were developed for specific application to a defined engineering project, and our subject to certain limitations cited within the source document.

I trust that this authorization is satisfactory to your needs; if not, please contact me directly.

Very truly yours,

GZA GEOENVIRONMENTAL, INC.
