Docket No. 50/395
Operating License No. NPF-12
NRC Notice of Violation

Dear Mr. O'Reilly:

In a letter dated November 4, 1983, South Carolina Electric and Gas Company (SCE&G) responded to the Notice of Violation addressed in Appendix A of NRC Inspection Report 83-27. In that letter, SCE&G committed to establish additional procedural controls to correct the inadequacies in the drawing control program as cited in Item B of the Notice of Violation by January 1, 1984. These procedures have been written and are presently undergoing internal review by SCE&G. Issuance of these procedures has been delayed by a recent plant outage and organizational changes which shifted certain responsibilities which impacted the drawing control program. A great deal of interface has been required within SCE&G to perfect these procedures. Procedure finalization is expected to proceed expeditiously, and SCE&G currently projects that the final procedures will be issued no later than January 31, 1984.

If you have any questions, please contact us at your convenience.

Very truly yours,

O. W. Dixon, Jr.
