

OCT 07 1991

Docket No. 50-219

Mr. John J. Barton
Vice President and Director
GPU Nuclear Corporation
Oyster Creek Nuclear Generating Station
P.O. Box 388
Forked River, New Jersey 08731

Dear Mr. Barton:

Subject: Inspection Report No. 50-219/91-25

This letter transmits the report of the routine resident safety inspection conducted by Mr. D. Vito for the period July 28, 1991, through August 31, 1991, at the Oyster Creek Nuclear Generating Station. The inspection consisted of document reviews, personnel interviews and observations of activities. Inspectors discussed the findings with you and members of your staff after the inspection.

Based on the results of this inspection, two of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation. We are concerned about the first violation because it represents weakness in your procedure control measures and is programmatic in nature. The second violation is of particular concern to us because of its repetitive nature and the corrective actions from the previous violation failed to prevent recurrence. You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room. The responses directed by this letter and the enclosed Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, Public Law No. 96.511.

I appreciate your cooperation.

Sincerely,

Original Signed By

E. Wenzinger, Chief
Projects Branch No. 4
Division of Reactor Projects
