Docket No. 50-219
LS05-84-01-042

Mr. Charles Kulp, Endangered Species
Specialist
U.S. Fish and Wildlife Service Region 5
Suite 322
315 South Allen Street
State College, Pennsylvania 16801

Dear Mr. Kulp:

The GPU Nuclear Corporation is the operator licensee for the Oyster Creek Nuclear Generating Station located in Ocean County, New Jersey. Oyster Creek has been operating under a provisional license since December 1969 and is now applying for a full term license. The location of the site and associated transmission lines are shown in the enclosed maps.

In conjunction with this application we are reviewing the Environmental Statement published in December 1974. Based on our interpretation of Section 7(c) of the Endangered Species Act Amendments of 1978 (PL 95-632) and the fact that construction of the Oyster Creek Station began prior to November 10, 1978, initiation of consultation is not required. However, to assure a thorough review, we request that your office provide any information you have on the distribution of any plants or animals listed or proposed to be listed as endangered or threatened species and which may be present in the vicinity of the Oyster Creek Station or its associated transmission corridor.

Sincerely,

Original signed by

Dennis M. Crutchfield, Chief
Operating Reactors Branch No. 5
Division of Licensing
