Docket Nos.: 50-445  
and 50-446

Mr. R. J. Gary  
Executive Vice President  
and General Manager  
Texas Utilities Electric Company  
2001 Bryan Tower  
Dallas, Texas 75201

Dear Mr. Gary:

Subject: Acceptability of the Postaccident Sampling System Design for  
the Comanche Peak Steam Electric Station (Units 1 and 2)

The NRC staff has completed its assessment of the postaccident sampling system design proposed for Comanche Peak and finds that the design fully meets the criteria specified in TMI Action Plan Item II.B.3. The staff's review was predicated on information contained in FSAR Amendments 36 through 44 and your letters dated August 26, 1983 and December 8, 1983 (the latter addressing further descriptive information delineated in my letter to you dated September 13, 1983). Documentation of the staff's evaluation will be incorporated in the next Comanche Peak SER supplement.

This action resolves SER License Condition (6); however, it is expected that the system will be installed in Unit 1 and operational prior to Unit 1 fuel load.

Sincerely,

Original signed by:

B. J. Youngblood
