Reference: Beaver Valley Power Station, Unit No. 1
Docket No. 50-334, License No. DPR-66
Updated Final Safety Analysis Report, Revision 1, January 1983

Gentlemen:

Enclosed are one (1) signed original and twelve (12) additional copies of the current annual revision to the Beaver Valley Power Station, Unit No. 1, Updated Final Safety Analysis Report.

This revision is submitted in accordance with 10 CFR 50.71 (e). To our best judgement and ability this revision accurately presents changes necessary to reflect information and analyses submitted to the Commission or prepared pursuant to Commission requirement. This revision also includes changes resulting from Duquesne Light Company reviews intended to provide additional clarification or editorial changes in the Updated FSAR.

Section 14.3 revisions are not complete at this time and will be forwarded during September of 1983.

Due to an administrative oversight Figures B.3-3 through B.3-12 were not removed from the Updated FSAR Revision 0, copies previously submitted to the Commission. These figures will be removed for Updated FSAR Revision 1 as noted in the insertion instructions.

Since the Updated FSAR is a controlled document, subject to periodic revision, and is intended to be used in recurring safety analyses, we ask that you acknowledge receipt of the current annual revision to the Updated FSAR. For your convenience in doing this, we have attached a "Records Transmittal Form." Your cooperation in this regard would be most appreciated.

SUBMITTAL OF ANNUAL REVISION
TO THE UPDATED FSAR

Pursuant to Section 50.71(e) of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Duquesne Light Company ("DLC"), holder of Provisional Operating License No. DPR-66, hereby submits the current annual revision to the Updated Final Safety Analysis Report, Revision 1, January 1983, for Beaver Valley Power Station Unit Number 1 (BVPS-1).

To my best personal knowledge and belief, and when reviewed in consideration of the qualifications noted in the attached letter, this revision to the Updated FSAR as submitted accurately presents changes necessary to reflect information and analyses submitted to the Commission or prepared pursuant to Commission requirement. Additionally, changes identified in the 1982 Report of Facility Changes, Tests and Experiments submitted under the provisions of 10 CFR 50.59 have been included in this Revision.

RECORDS TRANSMITTAL FORM
UPDATED FSAR CHANGES RECEIPT VERIFICATION

General

1. The Updated FSAR for Beaver Valley Power Station - Unit No. 1 is distributed as a controlled copy.
2. Each controlled copy holder (see Table 1 - Distribution List) is responsible for incorporating revisions and all changes issued to the applicable copy.

INSTRUCTIONS

1. Each Controlled Copy Holder is responsible for the condition, completeness, and current status of his/her controlled copy.
2. Duquesne Light Company personnel are responsible for ensuring, when applicable, that work references the current revision of the Updated FSAR and Updated FSAR Information Supplements, when appropriate.
3. This Updated FSAR Receipt, when signed by the Controlled Copy Holder documents accountability for the Updated FSAR controlled copy noted below.
4. Return this form to the Licensing and Compliance Section.
5. Revisions to the Updated FSAR are completed on a page for page replacement basis as per the instructions below. Colored pages (Information Supplements) are to be removed at this time that represent supplements to the revision being replaced.
6. Information Supplements are to be added to the appropriate sections of the Updated FSAR.
