SUBJECT: NRC INSPECTION REPGRT 50-458/94-23

This refers to the inspection conducted by Mr. T. W. Dexter of this office on October 3-7, 1994. The inspection included a review of activities authorized for your River Bend Station. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations of activities in progress.

Based on the results of this inspection, one of your activities appeared to be in violation of NRC requirements. The violation involved the granting of unescorted access to an individual who, by the licensee's procedures, could have been denied unescorted access. This violation is not being cited because the criteria in paragraph VII.B.2 of Appendix C to 10 CFR Part 2 of the NRC's "Rules of Practice," were satisfied. The violation was identified by your staff and prompt and effective actions were taken to correct the problem.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR 73.21, and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material will not be placed in the Public Document Room.
