Gentlemen:

CALLAWAY PLANT
DOCKET NUMBER 50-483
REVISION TO TECHNICAL SPECIFICATIONS
4.3.2.2, 4.7.1.2.1, AND THE BASES FOR
SPECIFICATION 3/4.7.1.2 FOR THE
AUXILIARY FEEDWATER SYSTEM

Union Electric Company herewith transmits an application for amendment to Facility Operating License Number NPF-30 for the Callaway Plant. This amendment application requests a revision to Technical Specifications 4.3.2.2, 4.7.1.2.1, and the Bases for Specification 3/4.7.1.2. These changes will decrease the frequency of testing auxiliary feedwater pumps, remove inconsistencies in testing requirements for the steam turbine-driven auxiliary feedwater pump, and clarify performance parameters in the Bases.

The Callaway Plant On-Site Review Committee and the Nuclear Safety Review Board have reviewed and approved this amendment application. Attachments 1 through 5 provide the marked-up Technical Specification changes, the retyped Technical Specification pages, Safety Evaluation, Significant Hazards Evaluation, and Environmental Consideration, respectively. It has been determined that this amendment application does not involve any unreviewed safety questions as defined in 10CFR50.59, nor a significant hazard consideration as determined per 10CFR50.92.
