CAROLINA POWER & LIGHT COMPANY
BRUNSWICK PROJECT
1975-1977 - 1,600 MW - UNITS 1 & 2
APPENDIX R - FIRE PROTECTION
ALTERNATIVE SHUTDOWN CAPABILITY ASSESSMENT QUARTERLY REPORT

Dear Mr. Vassallo:

In a July 27, 1983, letter to Carolina Power & Light Company, the Nuclear Regulatory Commission established conditions relating to the Alternative Shutdown Capability Assessment (ASCA) for the Brunswick Steam Electric Plant Units Nos. 1 and 2. These conditions include conducting monthly progress meetings with NRC Staff and submitting written quarterly progress reports on the ASCA. To date, five monthly progress meetings have been held (September 7, October 6, November 8, and December 7, 1983 and January 16, 1984) and one quarterly progress report has been submitted (November 7, 1983).

The second quarterly ASCA progress report is attached to this letter. Please contact my staff should you have any questions regarding this information.

Yours very truly,

P. W. Howe, Vice President
Brunswick Nuclear Project
