

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

JAN 25 1984

Docket Nos. 50-458

APPLICANT: Gulf States Utilities Company (GSU)

FACILITY: River Bend Station

SUBJECT: SUMMARY OF MEETING WITH GSU TO DISCUSS MANAGEMENT ORGANIZATION  
AND TRAINING TOPICS FOR CHAPTER 13 OF THE RBS SAFETY  
EVALUATION REPORT

The meeting was held on January 6, 1984 at the NRC offices in Arlington, Texas. A list of persons participating in the meeting is included as Attachment 1.

Gulf States Utilities letter RBG-16496 dated December 2, 1983 (Booker to Denton) was discussed. Certain clarifications and areas needing increased detail were enumerated. Some topics discussed were:

1. Figure 13.1-1 - GSU needs to display the relationship of the River Bend Nuclear Group to the GSU corporate structure.
2. GSU needs to show more clearly how the post Operating License drafting support for RBS will be accomplished.
3. GSU needs to show and discuss more fully where procurement actions for RBS are initiated and the procedures for procurement of parts/equipment for RBS.
4. More discussion is needed on the responsibilities and staffing for Director-Nuclear Training and Director-Support Services.
5. More detail is needed on responsibility delegation by the Vice President-Nuclear Operations.
6. The staff will require operators with no previous experience (as defined by the staff) to train on research reactors prior to receiving RO/SRO licenses.
7. The staff clarified required training course and curriculum requirements for particular RBS staff members.

E PDR

The staff also stated that GSU's intention to have procedures required for fuel load completed 70 days prior to fuel load may present problems due to the short period of time for staff review.

GSU will take the NRC's comments under consideration and the staff will be available for further discussion as required. Some of these issues could represent open items in the Safety Evaluation Report (SER) if not resolved prior to issuance of the SER.
