Subj: Fee for Review of WNP-4  
Operating License Application

Dear Mr. Miller:

On August 1, 1983, you advised the Washington Public Power Supply System that you notified the NRC Division of Accounting and Finance to issue an invoice for \$72,080 to the Supply System to cover the review costs for the WNP-4 Operating License Application. According to your letter, the amount of the invoice was based upon the expenditures incurred for professional staff-hours and contractual support services costs from the date the construction permit was issued until the date of postponement of the operating license review.

Could you please send us an itemized breakdown of these costs, including a detailed explanation of the specific number of professional staff hours used in the review of the WNP-4 OL application as well as a complete explanation of the contractual support services costs referred to in your letter. We further request that the payment due date of September 2, 1983, be extended until one month following our receipt of this information.

Sincerely,

Nicholas S. Reynolds
