

January 6, 1995

Southern Nuclear Operating Company, Inc.
ATTN: Mr. D. N. Morey
Executive Vice President
Nuclear Operations
P. O. Box 1295
Birmingham, AL 35201-1295

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-348/94-30 AND 50-364/94-30

This refers to the inspection conducted by T. M. Ross of this office on November 14 - December 11, 1994. The inspection included a review of activities authorized for the Farley Nuclear Plant. At the conclusion of the inspection, and at various times during the inspection, findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The purpose of the inspection was to determine whether activities authorized by the licensee were conducted safely and in accordance with NRC requirements.

The enclosed Inspection Report identifies activities which violate NRC requirements regarding inadequate clearance control but will not be subject to enforcement action because the licensee's efforts in identifying and correcting the violation met the criteria specified in Section VII.B of the Enforcement Policy.

In accordance with Section 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,
Original signed by:
David M. Verrelli/for

Harold O. Christensen, Acting Chief
Reactor Projects Branch 1
Division of Reactor Projects
