SUBJECT: PUBLIC MEETING - FACILITY RESTART

This refers to the meeting conducted at the Cooper Nuclear Station Training Facility on January 5, 1995. This meeting was open to the public and related to the progress the licensee has made toward completion of its restart readiness program and in the status of required NRC inspections necessary to confirm restart readiness.

The meeting principally consisted of dialogue between the two parties. The NRC staff expressed concerns regarding the integrity of the restart readiness program, licensee interim goal date slippage impacting NRC inspection needs, and concerns with delays in the submittal of NRR licensing actions. The licensee addressed these concerns. There were no handouts provided at the meeting. Agreement was reached that a 1-week delay in the start of the NRC's restart readiness team inspection would not adversely impact licensee restart goals.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the NRC's Public Document Room.

Should you have any questions concerning this matter, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director
Division of Reactor Projects
