South Texas Project Electric Generating Station
Units 1 and 2
Docket Nos. STN 50-498; STN 50-499
Unit 2 Fourth Refueling Outage
Dynamic Rod Worth Measurement

Houston Lighting & Power Company (HL&P) plans to implement the Westinghouse Dynamic Rod Worth Measurement Technique for the South Texas Project Electric Generating Station Unit 2 fourth refueling outage scheduled in the fall of 1995. Westinghouse submitted WCAP-13360, "Westinghouse Dynamic Rod Worth Measurement Technique", to the Nuclear Regulatory Commission in May 1992, and resubmitted this WCAP as a Cost Beneficial Licensing Action on June 17, 1994.

HL&P requests the Nuclear Regulatory Commission review and accept WCAP-13360 by July 1, 1995, so that this technique can be used by South Texas Project to measure rod worths during start-up following the scheduled fall Unit 2 refueling outage.

If you should have any questions, please contact Mr. K. J. Taplett at (512) 972-8416 or me at (512) 972-8787.
