In the Matter of  
 ILLINOIS POWER COMPANY, et al.  
 (Clinton Power Station, Unit 1)  
 Docket No. 50-461 OL

Dear Ms. O'Brien:

The NRC staff has prepared, in the context of informal discovery, the enclosed responses to the concerns expressed in your recent letter. Also enclosed is NUREG-0853, the Safety Evaluation Report for Clinton Power Station, Unit No. 1, a copy of which you requested and which you may keep. Because of its sheer volume, the BEIR III report that you requested is not enclosed. If you are unable to locate this document at a nearby public library, the Staff is willing to make available to you, on loan, one of the Staff's copies.

Sincerely,

William F. Patterson, Jr.  
 Counsel for NRC Staff
