SUBJECT: SNUBBERS FOR MILLSTONE NUCLEAR POWER STATION, UNIT 2

Your letter of July 15, 1981, proposing changes in the Technical Specifications (TS) relative to snubber surveillance at Millstone Unit 2, has been reviewed and we find that some modifications and additional information are needed.

As shown in the enclosed Technical Evaluation Report by our contractor, Lawrence Livermore National Laboratory, your proposal varies from our Standard Technical Specifications in several respects. These differences were discussed in a meeting with your staff and we understand that revisions are being considered. So that we may plan our further review, please provide the additional information within 30 days or inform us of your schedule for doing so.

This request for information affects fewer than 10 respondents; therefore, OMB clearance is not required under P.L. 96-511.

Sincerely,

Original Signed by J. R. Miller

James R. Miller, Chief
Operating Reactors Branch #3
Division of Licensing
