	E. Riley		W115				
	R. L. Vondrasek		S150				
	B. Walrath		W170				

Attached to this memorandum is the approved Corrective Action Plan for safety-related 4.16kv switchgear. This Corrective Action Plan describes the procedure to be used to install the Unit #1 4.16kv switchgear.

The procedure will be used by all Project Organization elements without deviation. Any answers to questions or interpretation of this procedure that are required will be supplied by Mr. John Marjenin and only by him.

This procedure will be added to the Project Administration manuals as quickly as possible, in the appropriate place. However, it is effective immediately.

R. L. Farrell, Manager
Nuclear Quality Assurance Department
