dated February 22, 1994 (LIC-94-0039)

SUBJECT: Supplement to Fort Calhoun Station Annual Radioactive Effluent
Release Report for 1993

Enclosed please find a supplement to the Fort Calhoun Station Annual Radioactive Effluent Release Report for 1993, which was submitted by Omaha Public Power District via Reference 2. This corrective supplement reflects recalculation of quarterly cumulative dose contributions from gaseous and liquid effluents, and revisions to the dilution and release volumes. As in previous annual reports, some vendor analyses could not be completed in time to be included in the original submittal.

Please contact me if you have any questions.

Sincerely,

T. L. Patterson
Division Manager
Nuclear Operations

TLP/tcm
