Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

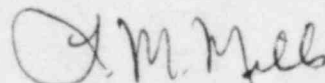

In the Matter of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328

Please refer to R. H. Shell's letter to you dated December 1, 1983 which responded to Generic Letter 82-33 requirements concerning Regulatory Guide 1.97 for the Sequoyah Nuclear Plant and committed TVA to provide an implementation date by February 15, 1984. Based on estimated design completion and material delivery dates, manpower projections, and the present projections of outage schedules, we anticipate that TVA will be in compliance with the requirements of Regulatory Guide 1.97 for Sequoyah units 1 and 2 at the end of the unit 2, cycle 4 outage. The unit 2, cycle 4 outage is currently scheduled to be complete by September 2, 1987. Please understand that any unanticipated changes in the scheduled outages will cause changes in the final implementation date.

If you have any questions concerning this matter, please get in touch with K. P. Parr at P13 858-2685.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
Nuclear Licensing
