Dallas, Texas 75201

Gentlemen:

This refers to the inspection conducted by our Senior Resident Inspector, Construction, Mr. R. G. Taylor, during the period March through July 1983, of activities authorized by NRC Construction Permits CPPR-126 and CPPR-127 for Comanche Peak, Units 1 and 2, and to the discussion of our findings with Mr. R. G. Tolson, and other members of your staff during the inspection.

Areas examined during the inspection included review, inspection, and evaluation of several allegations made to various NRC persons, including the Atomic Safety and Licensing Board in their proceedings regarding the operating license for Comanche Peak Steam Electric Station (CPSES). Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities were in violation with NRC requirements. You were notified of one such violation by our letter of May 31, 1983, to which you have responded. Details of the item enclosed with our May 31, 1983 letter are included in the enclosed inspection report.

One unresolved item is identified in paragraph 15 of the enclosed inspection report.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room unless you notify this office, by telephone, within 10 days of the date of this letter, and submit written application to withhold information contained therein within 30 days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1).
