

FEB 13 1984

Docket No.: 50-508

APPLICANT: Washington Public Power Supply System (WPPSS)

FACILITY: Washington Nuclear Project, Unit 3 (WNP-3)

SUBJECT: SUMMARY OF MEETING - WNP-3 LICENSING ACTIVITIES

On October 25, 1983, the staff and applicant representatives met to discuss the status of licensing activities at WNP-3. A copy of the meeting notice is enclosed (Enclosure 1). Persons attending the meeting are as follows:

D. Coleman, Supply System
G. Sorensen, Supply System
S. Prussman, EBASCO
A. Kohler, Supply System
A. Vietti, NRC, LPM
G. Knighton, NRC, BC
T. Novak, NRC, AD

The applicant presented a brief summary of Supply System organizational changes. (These organizational changes are documented in Amendment 4 to the WNP-3 Final Safety Analysis Report (FSAR), transmitted by letter dated, December 6, 1983). They informed the staff of the construction status of WNP-3 and presented the status of their responses to NRC requests for additional information (RAI's) (Enclosure 2). Supply System management stated they would continue to support the DSER effort, although, due to the projected fuel load date, not in accordance with the existing schedule. They requested additional time to submit responses to RAI's. The staff requested the Supply System make a formal submittal, stating their new projected fuel load date and proposed schedule for accomplishing the remaining licensing review milestones. (The Supply System responded by letter dated November 18, 1983, which is currently under review by the staff).

The meeting lasted approximately four hours.
