Licensing Branch No. 4

Re: McGuire Nuclear Station, Unit 1
Docket No. 50-369
Steam Generator Tube Vibration Monitoring Program

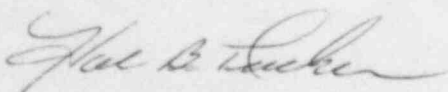

Dear Sir:

Attached are five copies of the Post Modification Steam Generator Tube Vibration Monitoring Program Preliminary Report which summarizes the results of the testing performed on McGuire Unit 1 steam generators in May - June, 1983.

This report contains information which is proprietary to Westinghouse and, accordingly, it is requested that it be withheld from public disclosure. In order not to delay this submittal of information requested by the Commission, Duke Power Company will comply with the requirements of 10 CFR 2.790 to provide proprietary and non-proprietary versions of the report together with an affidavit as soon as Westinghouse specifically identifies the proprietary information contained in the report and provides us with an affidavit. We will submit the total required number of copies of the proprietary and non-proprietary versions of the report and the required affidavit at that time. Westinghouse has advised us that this procedure has been discussed with Mr. E. Shomaker of the NRC Executive Legal Department and that he concurs.

A copy of this submittal is being sent to Westinghouse requesting them to specifically identify the proprietary information and to supply the required affidavit. Westinghouse has advised us that they will be able to return the report and affidavit to us within two weeks of their receipt of the report.

Very truly yours,

Hal B. Tucker
