

KANSAS GAS AND ELECTRIC COMPANY

GLENN L. KOESTER
VICE PRESIDENT - NUCLEAR

February 16, 1984

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

KMLNRC 83-017
Re: Docket No. STN 50-482
Ref: KMLNRC 83-148 dated 11/21/83 from GLKoester,
KG&E, to HRDenton, NRC
Subj: Emergency Plan Letters of Agreement and
Procedures

Dear Mr. Denton:

The Referenced letter stated the Letters of Agreement would be provided 180 days prior to scheduled fuel load for Wolf Creek. Transmitted herewith are recently executed Letters of Agreement with Coffey County Hospital Ambulance Service and Ransom Memorial Hospital. The Letters of Agreement with the Coffey County Sheriff, Kansas University Medical Center and Westinghouse are still being negotiated. Present planning calls for these additional Agreements to be submitted by April 15, 1984.

These Agreements will be formally incorporated into the Wolf Creek Generating Station, Unit No. 1, Final Safety Analysis Report in Revision 13. This information is hereby incorporated into the Wolf Creek Generating Station, Unit No. 1, Operating License Application.

Provided separately for the NRC's review is a set of Wolf Creek Generating Station's Emergency Plan Implementing Procedures. These procedures are available for review at the Wolf Creek Generating Station plant site.

Yours very truly,

Kent R Brown
for Glenn L. Koester
Vice President - Nuclear

Dear Mr. Koester:

I have visited on several occasions with Kevin Moles of K.G.&E. about Ransom Memorial Hospital's possible role in providing emergency services to your employees and the general population.

Ransom Memorial, the staff and the Medical Staff are able to provide for both conventional and radiation injuries.

In order to provide these services, we will need to make some preparations such as setting up one specific area and we are also investigating the updating of our radio equipment which is, at this time, very inadequate.

I am under the impression that we can expect some assistance from K.G.&E. to gear up to provide these necessary services. We also understand that you can provide training for our personnel.

Resources of the hospital include two operating suites, a four bed Emergency Room, one special unit to be set up for WCGS as an emergency receiving area, and 65 acute care beds.

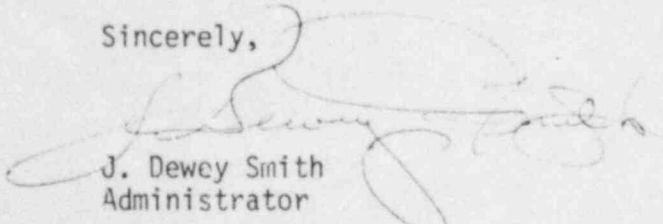

We assure that:

1. Requests for consultation with the University of Kansas Medical Center will be made when necessary.
2. In the case of an individual from WCGS contaminated with radioactivity, Ransom Memorial Hospital will utilize the expertise of the accompanying WCGS personnel to advise Hospital staff pending contact made with the KUMC Health Physicist on matters relating to dosimetry, contamination control and decontamination.

3. Following decontamination of the individual, accompanying WCGS personnel will be relied upon to assist in the decontamination of rooms and equipment. The recommendation as to whether these facilities are suitable for unrestricted use will be made upon the recommendation of the accompanying WCGS personnel.
4. Consumable items contaminated with radioactive materials will be disposed of properly by K.G.&E. The accompanying WCGS personnel may be relied upon to identify and collect such items.
5. Personnel and equipment will be made available for the planning of and participation in annual medical emergency drills consistent with Item 3 above. These drills would be followed by a critique and written evaluation.
6. Members of Ransom Memorial Hospital staff will participate in appropriate training and seminars offered by K.G.&E. relative to Ransom Memorial Hospital's response as specified above.
7. This agreement shall continue for a period of five (5) years, and may be modified upon the mutual consent of K.G.&E. and Ransom Memorial Hospital. This agreement shall be reviewed and updated as appropriate at least once every two (2) years. This agreement may be cancelled by either party upon 180 day written notice.

In as much as all of our physicians are independent of the hospital and we have no "house physicians", I suggested to Kevin Moles that he contact each physician to be assured that they will respond in case of need.

Sincerely,

J. Dewey Smith
Administrator

Wichita, Ks. 67201

Dear Mr. Koester:

This letter responds to your letter of April 18, 1983, and discussions with members of your emergency planning staff.

The Coffey County Hospital Ambulance Service is prepared to respond to requests from the Wolf Creek Generating Station (WCGS) for emergency medical transportation. This commitment is consistent with the Charter of the Coffey County Hospital Ambulance Service from the Board of Trustees of the Coffey County Hospital.

Consistent with this Charter, the Coffey County Hospital Ambulance Service will assure that:

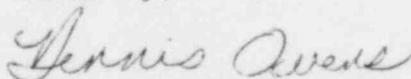

1. Resources from the Coffey County Hospital Ambulance Service or from mutual aid organizations in Woodson, Anderson or Lyon Counties are activated upon the dispatcher's receipt of a call from the WCGS. The combined resources from these four organizations currently consist of eight ambulances.
2. The response, unless otherwise requested, will consist of a single ambulance. The ambulance will contain equipment consistent with the requirements for an ambulance under K.S.A. 65-4320. The crew will include at least one Emergency Medical Technician. Such individuals are trained and registered in accordance with the regulations, K.A.R. 28-40-1, etc., sec., administered by the State of Kansas Department of Health and Environment.
3. The normal response time is within 30 minutes if the ambulance does not have to come from mutual aid organizations.
4. Calls of a life threatening nature will receive the highest priority.

Mr. Glenn Koester
June 6, 1983
Page 2

5. In the case of the transport of an individual contaminated with radioactive material, the accompanying WCGS personnel as necessary will be relied upon to advise the ambulance crew on matters relating to dosimetry, contamination control and decontamination.
6. The WCGS personnel will be relied upon to determine if unrestricted use of equipment and personnel is practical based on the level of radioactive contamination, and the means readily available to decontaminate the affected items.
7. The WCGS personnel will be relied upon to determine the disposal method for consumable items that are contaminated with radioactivity.
8. Personnel and equipment will be made available for an annual medical emergency drill consistent with Item 4 above.
9. Members of the Coffey County Hospital Ambulance Service will participate in appropriate training to respond as specified above.

If you have any questions regarding this letter, please have your staff contact me at 316-364-2121, Ext. 24.

Sincerely,

Dennis Owens,
Administrator
