Docket No. 52-423
B11016

Mr. B. J. Youngblood
Chief Licensing Branch No. 1
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Youngblood:

Reference: (1) B. J. Youngblood letter to W. G. Counsil, dated December 20, 1983.

Millstone Nuclear Power Station, Unit No. 3
Scheduled Meetings to Resolve Open Items in the Draft SER

Reference (1) transmitted the Draft Safety Evaluation Report for Millstone Unit No. 3. We understand that the remaining portions will be provided to us as they become available. The draft SER has been reviewed by my staff, and responses to the open items are being prepared to resolve the open items in support of your requested May 15, 1984 deadline. In order to help ensure the successful disposition of the open items, we are proposing a series of meetings with the NRC staff, through the NRC Project Manager, Ms. E. Doolittle. The schedule for the proposed meetings is attached. We expect to supplement this schedule as necessary to support the development of the remaining portions of the NRC staff branch technical reviewer's input to the SER. Should you perceive any indication which would not support issuance of the SER by July 16, 1984, please inform me immediately.

Very truly yours,

W. G. Counsil
Senior Vice President
