CAROLINA POWER & LIGHT COMPANY
SHEARON HARRIS NUCLEAR POWER PLANT
1986-90 - 900,000 KW - UNITS 1 & 2
BUS DUCT AND TRANSFORMER WELD DEFICIENCIES, ITEM 143

Dear Mr. O'Reilly:

On September 2, 1983, Mr. K. V. Hate' notified the NRC (Mr. P. Bemis) of a potentially reportable item per the provisions of 10CFR50.55(e) and 10CFR, Part 21. The NRC was informed that vendor weld deficiencies were noted by CP&L in sections of Bus Duct numbers CC-1 and CC-2 and Transformer numbers 1D1, 1D2, 1E1, and 1E2 received from Gould-Brown-Boveria, Chalfont, Pennsylvania.

CP&L is currently investigating this item and awaiting a response from the vendor. It is projected that the vendor will require until January 1984 to respond with their evaluation. For this reason, we will require until January 13, 1984 for submitting a report on the reportability of this item.

Thank you for your consideration in this matter.

Yours very truly,

R. M. Parsons
Project General Manager
Shearon Harris Nuclear Power Plant
