

Docket: 50-382/83-23

22 AUG 1983

Louisiana Power and Light Company  
ATTN: Mr. L. V. Maurin  
Vice President Nuclear Operations  
142 Delaronde Street  
New Orleans, LA 70174

Gentlemen:

This refers to a preoperational inspection of your radiation protection program conducted by Mr. H. D. Chaney of this office during July 11-15, 1983, of the activities authorized by NRC Construction Permit CPPR-103, for Waterford Steam Electric Station, Unit No. 3 (WF-3), and to the discussion of our findings with Mr. S. A. Alleman and other members of your staff at the conclusion of the inspection on July 15, 1983.

Areas examined during the inspection included: (1) corporate radiation protection organization, (2) site radiation protection staff qualification, (3) radiation protection training program, (4) personnel radiation exposure control program, (5) respiratory protection program, (6) radiological survey program, (7) health physics supplies and radiation protection equipment, (8) radiation protection instruments and calibration, (9) radiation protection facilities, and (10) reactor startup survey program. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by inspector. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room unless you notify this office, by telephone, within 10 days of the date of this letter, and submit written application to withhold information contained therein within 30 days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1).
