U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Limerick Generating Station, Units 1 and 2
Summary Description of Vehicle Control Measures in
Response to 10CFR73 Rule, "Protection Against Malevolent
Use of Vehicles at Nuclear Power Plants"

Dear Sir:

On August 1, 1994, the NRC issued Final Rule 10CFR73, "Protection Against Malevolent Use of Vehicles at Nuclear Power Plants," which amended the NRC's regulations concerning the design basis threat for radiological sabotage to include the use of a land vehicle by adversaries for transporting personnel and their hand-carried equipment to the proximity of vital areas, and to include a land vehicle bomb. 10CFR73.55(c)(9)(I) requires that licensees submit a summary description of the proposed vehicle control measures and the results of the vehicle bomb comparison as stipulated in 10CFR73.55(c)(7) and 10CFR73.55(c)(8), respectively, by February 28, 1995. Enclosed is the required "Summary Description" for Limerick Generating Station (LGS), Units 1 and 2. The "Summary Description" does not contain Safeguards Information. However, the supporting documentation provided as attachments to the "Summary Description" does contain Safeguards Information. Therefore, this information must be controlled accordingly as required by 10CFR73.21, and is not for public disclosure.

If you have any questions or require additional information, please do not hesitate to contact us.

Very truly yours,

Enclosure
