

February 14, 1984

DCR 016

Docket Nos. 50-313
and 50-368

Mr. John M. Griffin, Vice President
Nuclear Operations
Arkansas Power and Light Company
P. O. Box 551
Little Rock, Arkansas 72203

Dear Mr. Griffin:

The NRC staff is currently addressing a Commissioner's comments concerning the Emergency Operations Facility (EOF) for Arkansas Nuclear One (ANO). Specifically, we are addressing the feasibility and cost of upgrading the primary EOF for ANO to a radiation protection factor (PF) of 5.

As discussed with members of your staff, the Commission is reviewing the proposed staff approval of your position concerning the PF of the primary EOF and the location of the backup EOF for ANO. Our assessment of the feasibility and cost of upgrading the primary EOF for ANO will be one of the major factors considered by the Commission in deciding whether it agrees with the staff approval of your position concerning the EOF. We are requesting your assistance in this matter. Your response is requested no later than March 2, 1984, in order to expedite the NRC review.

The reporting and/or recordkeeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P.L. 96-511.

Please contact your Project Managers, G. Vissing or R. Lee, if you have any questions concerning this request.

Sincerely,

John F. Stolz, Chief
Operating Reactors No. 4
Division of Licensing

James R. Miller, Chief
Operating Reactors No. 3
Division of Licensing
