Subject: Duane Arnold Energy Center
Docket No: 50-331
Op. License No: DPR-49
Revision to Technical Specifications Table Of Contents
Reference: 1) Technical Specifications Amendment 205, dated
December 29, 1994
2) Letter, J. Franz (IES) to W. Russell (NRC),
NG-94-0669, dated June 30, 1994, "Request for Operating
License Amendment (RTS-257): Addition of Control
Building Chiller Operability and Surveillance Requirements"
File: A-117, X-41

Dear Mr. Russell:

In Reference 1 above, an amendment to the Operating License and Technical Specifications (TS) for the Duane Arnold Energy Center (DAEC) was issued based on our request per Reference 2. During the implementation of that amendment, we discovered that the Table Of Contents page iii had not been updated to reflect the new section added by the amendment. The purpose of this letter is to request a revision to the Technical Specifications Table Of Contents to incorporate the new section. The proposed change to the Table Of Contents is reflected on the attached page.

The proposed change to the Table Of Contents is editorial in nature and does not affect our analysis of significant hazards considerations provided in Reference 2.

This letter contains no new commitments.
