Re: Application for License to Export
Enriched UF6 for Ohi Nuclear
Power Plant Unit No. 2.

Gentlemen:

Please find enclosed our application in triplicate for license to export slightly enriched UF6. This material will be used for the fabrication of fuel assemblies and ultimately loaded into Region Number 10A of the Ohi Nuclear Power Plant Number 2 owned by the Kansai Electric Power Company, Inc.

The contract number for the uranium enriching services with the U.S. Department of Energy is E(49-14) UES/JA-019.

The feed material is supplied from the Republic of South Africa.

The relevant enriched UF6 will be delivered at the U.S. D.O.E. Oak Ridge Enrichment Plant in Oak Ridge, Tennessee. After being exported to Japan, it will be converted to UO2 powder, pelletized and fabricated into fuel assemblies by Mitsubishi Nuclear Fuel Ltd.

As the validity of the export license, we wish to have a two year period from the date of issuance.

With regard to sampling, we request that two (2) P-10 tube samples be taken from each parent cylinder. The sample should be delivered to us c/o Teledyne Isotopes for independent analysis. We also request that the Nuclear Audit and Testing Company witness the weighing and sampling.
