

OCT 12 1983

Westinghouse Electric Corporation
ATTN: Mr. W. H. Britton, Manager
Columbia Plant
Nuclear Fuel Division
Drawer R
Columbia, SC 29250

Gentlemen:

SUBJECT: REPORT NO. 70-1151/83-19

This refers to the routine safeguards inspection conducted by Mr. B. L. Richards of this office on September 12-15, 1983, of activities authorized by NRC License No. SNM-1107 at Westinghouse Nuclear Fuel Division, Columbia Plant and to the discussions of our findings held with you and members of your staff, at the conclusion of the inspection.

Areas examined during this inspection included your program for nuclear material control and accountability under the applicable provisions of Title 10, Code of Federal Regulations, Part 70, "Special Nuclear Material," and specific license conditions. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, performance tests, and observations by the inspectors.

Within the scope of this inspection, no violations or deviations were disclosed.

During the inspection, a finding similar to one identified in Inspection Report No. 70-1151/83-08 (Violation B), conducted May 19-24, 1983, was identified. Based on a telephone conversation between D. Jones of this office and C. Sanders of your staff, it is our understanding that corrective action for the current inspection finding will be addressed in a supplemental response to Inspection Report No. 70-1151/83-08 (Violation B).

In accordance with Section 2.790(d) of the NRC's "Rules of Practice", Part 2, Title 10, Code of Federal Regulations, activities involving safeguards and security measures are exempt from public disclosure; therefore, the enclosed report with the exception of the cover page, which is an inspection summary, will not be placed in the Public Document Room.

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

8310260104 831012
