

UNION ELECTRIC COMPANY

1901 GRATIOT STREET  
ST. LOUIS, MISSOURI

March 1, 1984

DONALD F. SCHNELL  
VICE PRESIDENT

MAILING ADDRESS:  
P. O. BOX 149  
ST. LOUIS, MISSOURI 63166

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

ULNRC- 751

DOCKET NUMBER 50-483  
CALLAWAY PLANT, UNIT 1  
FINAL SAFETY ANALYSIS REPORT, REVISION 7  
Reference: ULNRC-746 dated February 17, 1984

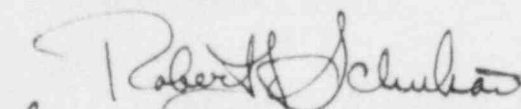

Furnished herewith are seventy-five copies of Revision 7 to the Callaway Plant Final Safety Analysis Report Site Addendum. Seventy-five copies of Revision 13 to the SNUPPS Standard Plant Final Safety Analysis were transmitted by Mr. N. A. Petrick, Executive Director, SNUPPS by SLNRC 84-0018 dated February 2, 1984. These revisions are hereby incorporated by reference into the Callaway Application.

Site Addendum Revision 7 includes revised portions of Section 17.2 covering quality assurance during the operating phase and Appendix 3A which addresses regulatory guides. This information was discussed with NRC during a meeting at the Callaway Site on February 15 and 16, 1984 and was previously transmitted by the referenced letter.

Also included is a revision to the Callaway Radiological Emergency Response Plan (RERP). These changes have been discussed with NRC at meetings on January 20, 1984, February 8, 1984 and February 21, 1984. For user convenience, Revision 7 to the RERP is packaged separately from the remainder of Revision 7. This is done to facilitate distribution of the RERP to personnel in addition to the normal FSAR holders.

Revision 7 includes a clarification to our commitment concerning NUREG-0737, Item II.B.4, Training for Mitigating Core Damage. This training meets the intent of the INPC guidelines and will be complete for all SRO's, RO's, and STA's prior to fuel load.

Very truly yours,

  
for Donald F. Schnell
