This letter confirms in writing arrangements made with members of your staff for a Point Beach Nuclear Plant site visit by members of the Nuclear Regulatory Commission (NRC) staff on November 1 through November 3, 1983.

The purpose of this site visit is to obtain additional information needed by the staff and our contractor to complete our evaluation of the Point Beach Units 1 and 2 inservice testing (IST) program for pumps and valves. In our previous letter dated August 24, 1983, we included a list of NRC staff members and contractors participating in the site visit and a request for additional information related to your IST program. Those remain applicable.

Please have members of your staff knowledgeable in the development and implementation of your IST program available to assist us. In particular, they should be able to discuss the items in our August 24, 1983 request for additional information. Your cooperation in this matter is greatly appreciated.

Sincerely,

Original signed by:

James R. Miller, Chief  
Operating Reactors Branch #3  
Division of Licensing
