NRC Docket 50-321  
Operating License DPR-57  
Edwin I. Hatch Nuclear Plant Unit 1  
Amendment to Request For Change To  
Plant Hatch Unit 1 Technical Specifications

Gentlemen:

Georgia Power Company wishes to clarify our September 29, 1983 submittal which proposed Technical Specification changes in support of our planned shutdown for core reconstitution. We would clarify the second paragraph of the first page as follows:

The ECCS calculations were done using approved General Electric models which meet the criteria specified in 10 CFR 50 Appendix K. We reviewed the peak clad temperatures resulting from these models for the proposed fuel types and concluded that the results conform to the criteria of 10 CFR 50.46 and of References 2, 3, and 4.

If you have any questions regarding this clarification, please contact this office.

Yours very truly,

L. T. Gucwa  
Manager Nuclear Engineering and  
Chief Nuclear Engineer
