SUBJECT: NRC INSPECTION REPORT 50-445/95-05; 50-446/95-05

This refers to the inspection conducted by Messrs. W. Wagner and D. Pereira of this office on February 13-17, 1995. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station, Units 1 and 2, facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. A routine inspection of the fire protection program and followup of previously identified inspection findings was performed. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented on page 1, in the enclosed report. The implementation of the fire protection program satisfied the fire protection safety objectives.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

  
Thomas P. Gwynn, Director  
Division of Reactor Safety
