TELECOM, BILL GRAHAM & CHARLES WEST, TENNESSEE DEPARTMENT OF PUBLIC HEALTH

On July 17, 1968, I called Bill Graham to ask if he had any information on an American Nuclear Corporation model CS-380 sealed source. I told him that the AEC has an application to license the source. American Nuclear is located in Oak Ridge, Tennessee.

Bill had Charles West enter our conversation and West told me he had received incomplete information from American Nuclear concerning the source. Also that on June 7, 1968, he had written the manufacturer to inform him that more information was needed. On July 8th West visited American Nuclear and discussed the deficiencies mentioned in his June 7th letter; however, at this time he has not received the information requested from the manufacturer. Bill Graham mentioned that his office has encountered a great deal of difficulty in their working with Mr. Graybeal, President, American Nuclear Corporation.

Bill agreed to notify us immediately if the source was approved for licensing.

I informed Frank Davis, DHE, of the status of the ANC source.
