

Federal Emergency Management Agency

Washington, D.C. 20472

MAY 31 1991

Mr. Frank J. Congel
Director, Division of Radiation Protection
and Emergency Preparedness
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Congel:

Enclosed is a copy of the final exercise report for the November 15, 1989, full participation exercise of the offsite radiological emergency response plans, site-specific to the Surry Power Station. The Commonwealth of Virginia; the Counties of Surry, Isle of Wight, James City, York, Charles City, and New Kent; and the Cities of Williamsburg, Newport News, Poquoson, and Hampton fully participated in the exercise. The exercise report was prepared by the Federal Emergency Management Agency's (FEMA) Region III staff. A copy of the report will be forwarded to the Commonwealth of Virginia by the Region III staff.

There were no Deficiencies identified during the November 15, 1989, exercise. However, 34 Areas Requiring Corrective Action were identified during the exercise. FEMA's Region III staff will monitor the status of corrective actions.

Based on the results of the November 15, 1989, exercise, the offsite radiological emergency response plans and preparedness for the Surry Power Station are adequate to provide reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public in the event of a radiological emergency at the site. Therefore, the Title 44 CFR, Part 350, approval of the offsite radiological emergency response plans and preparedness site-specific to the Surry Power Station, granted February 23, 1983, will remain in effect.

If you should have any questions, please contact Mr. Craig S. Wingo, Chief, Radiological Preparedness Division, at (202) 646-3026.

Sincerely,

Dennis H. Kwiatkowski
Assistant Associate Director
Office of Technological Hazards
