Gentlemen:

We have received a copy of your application dated February 14, 1983, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. The application requested the deletion of obsolete or redundant provisions contained in the Peach Bottom Atomic Power Station Unit Nos. 2 and 3 Environmental Technical Specifications.

Based on information provided by the ONRR staff as the result of their preliminary review of your application, it has been determined that a Class III fee (\$4,000) and a Class I fee (\$400) are appropriate for that portion of your application relating to deletion of Sections 2.3/3.3 and 6.3.b since the review will be more than administrative or pro forma in nature and will involve a duplicate unit. It is NRC policy not to charge fees for deletion of non-radiological water quality conditions in cases where licenses have an effective NPDES Permit. On this basis, we have concluded that an exemption, pursuant to 10 CFR 170.11(b), from the fee requirements is authorized by law and such exemption is otherwise in the public interest and is hereby granted for that portion of your February 14, 1983 application relating to deletion of non-radiological water quality conditions.

In summary, you are requested to remit the sum of \$4,400 to this office. If the ONRR staff's final review of your application reveals that these fees are not correct, you will be notified and any necessary adjustments will be made.

Sincerely,

Signed, B. James Holloway, Jr.
