

April 7, 1995

Mr. F. Kevin Reilly  
DLA/DNSC-0  
1745 Jefferson Davis Highway  
Suite 100, Crystal Square #4  
Arlington, VA 22204

Dear Mr. Reilly:

I am writing in response to your recent, undated, letter providing the Defense Logistics Agency's (DLA's) responses to the U.S. Nuclear Regulatory Commission staff's January 25, 1995, comments on your proposed groundwater assessment workplan. NRC staff has reviewed your revisions, and the additional information provided in your letter, and has concluded the groundwater assessment, if conducted in accordance with the revised workplan, should provide the NRC staff with an adequate basis to determine whether the groundwater at Curtis Bay facility has been impacted by past DLA activities. Therefore, your groundwater assessment workplan, dated June (no day) 1994, as augmented by the hydrogeologic data, dated December 9, 1994, and the additional information and revisions in your recent undated letter, is approved. However, additional work may be needed beyond that described in the workplan, as amended, based on the information, disclosed in the groundwater assessment. Please note that you may be inspected during the completion of the remediation of the Curtis Bay site and the procedures discussed in the revised workplan may be used to determine whether you are in compliance with the workplan and NRC's regulations.

Development of this letter has been coordinated with the Maryland Department of the Environment. If you have any questions, please contact me at (301) 415-6749.

Sincerely,

[Original signed by]

Dominick A. Orlando, Project Manager

Dear Mr. Reilly:

I am writing in response to your recent, undated, letter providing the Defense Logistics Agency's (DLA's) responses to the U.S. Nuclear Regulatory Commission staff's January 25, 1995, comments on your proposed groundwater assessment workplan. NRC staff has reviewed your revisions, and the additional information provided in your letter, and have concluded the groundwater assessment, if conducted in accordance with the revised workplan, should provide the NRC staff with an adequate basis to determine whether the groundwater at Curtis Bay facility has been impacted by past DLA activities. Therefore, your groundwater assessment workplan, dated June (no day) 1994, as augmented by the hydrogeologic data, dated December 9, 1994, and the additional information and revisions in your recent undated letter, is approved and you may commence remedial activities as described in the plan. However, NRC retains the authority to require revisions to the workplan, or any procedures or plans developed to support the workplan, if NRC determines that these procedures or plans may not be protective of the public health and safety. Please note that you may be inspected during the completion of the remediation of the Curtis Bay site and the procedures discussed in the revised workplan may be used to determine whether you are in compliance with the workplan and NRC's regulations.

Development of this letter has been coordinated with the Maryland Department of the Environment. If you have any questions, please contact me at (301) 415-6749.

Sincerely,

Dominick A. Orlando, Project Manager
