

OFFICE OF THE  
COMMISSIONER

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555

Ref. EDO 6796 (MUTS  
Murley 9/00/67)  
Cys: Taylor  
Snizek  
Thompson  
Blaha

July 26, 1991

MEMORANDUM FOR: James M. Taylor  
Executive Director for Operations  
FROM: Forrest J. Remick  
SUBJECT: MILESTONES AND CRITICAL PATHS FOR REVIEWING  
ADVANCED REACTORS

In the SRM on SECY-90-353, I requested that "staff ensure that it has a mechanism in place to track technical issues, schedules, open items, and critical paths throughout the certification process."

In SECY-91-161, you provided the Commission with realistic schedules for the advanced reactor reviews and regulatory guidance revisions. That SECY paper did not provide an analysis of interim milestones and critical paths. In order for the Commission and me to assess the progress made by staff and industry on the ABWR, System-80+, AP600, and SBWR certification process, I would appreciate quarterly updates of a PERT or similar type schedule and analysis with all the major milestones and resources identified for each review. I would appreciate the first report prior to the Commission's meeting with industry on schedules.

Your assistance on this matter is appreciated.

cc: The Chairman  
Commissioner Rogers  
Commissioner Curtiss  
OGC  
SECY

*I join Commissioner Remick in this request.*
