Mr. William O. Miller  
Isotopes Branch  
Division of Licensing & Regulation  
United States Atomic Energy Commission  
Washington 25, D. C.

Dear Mr. Miller:

We recently sent a number of documents for evaluation prior to production and request that certain of these be withheld from public disclosure indefinitely.

We request that they be withheld for the following reasons:

1. Several of them are the basis of a pending patent application.
2. We consider that making these documents available for public inspection would give our competitors an unfair advantage and make available information gained from considerable research time and expense.

We would supply a sketch of our system for public disclosure if required. This sketch would not give details that we request be withheld, but would supply only general information about our cell.

If you have any questions concerning this request, please feel free to contact me at 268-2281, area code 215.

Very truly yours,

*J. Peters*
