Gentlemen:

VOGTLE ELECTRIC GENERATING PLANT
REVISION TO REQUEST FOR WITHHOLDING

Georgia Power Company transmitted WCAP-12788, Revision 1, "RTD Bypass Elimination Licensing Report for Vogtle Electric Generating Plant," to the NRC with letter ELV-02627 dated March 29, 1991. Included with this report was a request for certain information marked as proprietary to Westinghouse be withheld from public disclosure pursuant to 10 CFR 2.790.

By letter dated August 1, 1991, the NRC requested that Westinghouse amend its request for withholding in order to allow disclosure of the information on tables 2.1-1 and 3.1-4 of WCAP-12788, or provide additional justification for withholding the data. Attached is Westinghouse letter CAW-91-140 dated August 21, 1991, which responds to the NRC letter. It agrees with the release of table 2.1-1 and provides additional justification for continuing to withhold table 3.1-4 from disclosure. It also agrees that the value for "N LOOP RCS FLOW UNCERTAINTY (WITH BIAS VALUES)," found on table 3.1-8 of WCAP-12788, Revision 1, may be released to the public. The revised proprietary and nonproprietary versions of tables 2.1-1 and 3.1-8 are also attached.

Please feel free to contact either Georgia Power Company or Westinghouse should you need further information concerning disclosure of Westinghouse proprietary information that has been submitted to the NRC in support of the Vogtle Electric Generating Plant.

Sincerely,

C. K. McCoy
