Gentlemen:

Subject: **Docket Nos. 50-361 and 50-362
Withdrawal of Amendment Applications Superseded by
the Technical Specification Improvement Program (TSIP)
San Onofre Nuclear Generating Station,
Units 2 and 3**

References: (See enclosure)

This letter withdraws four License Amendment Applications (References 1 through 4) which have been superseded by our TSIP submittal (Reference 5). References 1 through 4 submitted Proposed Change Numbers (PCNs) 364, 416, 420, and 428. Since submittal of these PCNs, the Southern California Edison (SCE) Company has submitted PCN 299, Technical Specification Improvement Program. PCN 299 incorporates, and in some cases supersedes, each of these four PCNs. NRC approval of SCE's requested changes will therefore occur as part of the NRC's approval of PCN 299.

If you have any questions regarding this, please let me know.

Sincerely,

cc: L. J. Callan, Regional Administrator, NRC Region IV
A. B. Beach, Director, Division of Reactor Projects, Region IV
K. E. Perkins, Jr., Director, Walnut Creek Field Office, NRC Region IV
