IN RESPONSE REFER  
TO FOIA-83-515

Dear Ms. Bell:

This is a final response to your letter dated August 26, 1983 in which you requested, pursuant to the Freedom of Information Act, seven categories of documents regarding nuclear power plants on which construction has ceased but which continue to hold valid construction permits. We have interpreted Items 1, 2, and 3, as listed on your request, to mean a generic study and analysis of the issues, not plant specific.

We have identified the 11 documents listed on Appendix A, which are responsive to your request. These documents are already available for public inspection and copying at the NRC Public Document Room (PDR), 1717 H Street, NW, Washington, DC 20555. You may obtain copies of these documents by referring to their accession numbers. Also, the 5 documents listed on Appendix B are being placed in the PDR. You may obtain access to the documents listed on Appendix B by presenting a copy of this letter to the PDR or requesting folder FOIA-83-515.

The charge for reproducing records located in the PDR is five cents (\$0.05) per page, as specified in 10 CFR 9.14(a). A copy of these documents can be purchased by writing directly to the PDR, or by calling (202) 634-3273. Upon your agreement to pay the reproduction charges, the PDR will arrange for the records to be reproduced by Literature Research Company, a private reproduction contractor servicing the PDR. You will be billed by Literature Research Company for the reproduction charges, plus tax and postage.

Please note that the enclosure to document number 11, as listed on Appendix A, has been sent to the Department of Energy for releasability determination and direct response to you.

This completes NRC's action on your request. We want to thank you for extending the time of your request and for your patience in this matter.

Sincerely,

G. M. Felton, Director  
Division of Rules and Records  
Office of Administration
