Inspection Summary

Inspection on November 15-18 and 28, 1983 (Reports No. 50-266/83-22(DRMSP); 50-301/83-21(DRMSP))

Areas Inspected: Included a review of the licensee's special security measures being utilized during major plant construction. In addition, the following areas were inspected: Security Organization - Personnel, Testing and Maintenance, Physical Barriers - Protected Area, Physical Barriers - Vital Areas, Assessment Aids, Access Control - Personnel, Packages and Vehicles, and Detection Aids - Protected Area. The inspection involved 28.5 inspector-hours onsite by one NRC inspector. The inspection began during the day shift; six of the 28.5 hours were accomplished during off-shift periods. The inspection was conducted at the request of the NRC Senior Resident Inspection.
