MEMORANDUM FOR: Edward L. Jordan
Director, Division of Emergency Preparedness
and Engineering Response
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission

FROM: *Richard W. Krim*
Richard W. Krim
Assistant Associate Director
Office of Natural and Technological
Hazards Programs

SUBJECT: Regional Assistance Committee (RAC) Review of Long Island
Lighting Company (LILCO) Transition Plan for the Shoreham
Nuclear Power Station

On October 27, 1983, the Federal Emergency Management Agency (FEMA) asked for an extension of 60 days (i.e., until February 1, 1984) to complete a thorough, detailed RAC review of Revision 1 of the LILCO Transition Plan for the Shoreham Nuclear Power Station. Via your memorandum of November 10, 1983, the Nuclear Regulatory Commission (NRC) granted that extension but requested that FEMA include Revision 2 in the RAC review. This had already been delivered to RAC members. In addition, via a letter of December 8, 1983, from Hunton and Williams, legal counsel for LILCO, FEMA received an amended list of effective pages of Revision 2. Finally, on December 14, 1983, FEMA was notified by Hunton and Williams that Revision 3 of the plan would be received during the week of December 19, 1983.

FEMA will make every effort to complete the review of the LILCO Transition Plan including Revisions 2 and 3 as close to February 1, 1984 as possible provided we receive the required material from LILCO no later than January 3, 1984. However, based on a preliminary examination of Revision 2 and preliminary information on Revision 3, some additional time beyond the originally projected date of February 1, 1984, will probably be needed to assure a comprehensive analysis of the plans by a full RAC review. In order to give FEMA's analysis and finding to NRC as soon as possible, we will need prompt distribution of the collated LILCO Transition Plan to all RAC members no later than January 3, 1984, including Revision 3, with appropriate cross-references to NUREG-0654. It is our understanding that LILCO intends to provide FEMA and the RAC members with comprehensive plans that incorporate both Revisions 2 and 3. Upon receipt of these plans and the cross-referencing mentioned below, a full, independent RAC review will begin.

PDR ADOCK 05000322
G PDR

In the interest of efficiency and effective utilization of RAC members and FEMA's resources, we request that the utility also prepare a matrix which identifies page changes affected by each revision of the plan with references to NUREG-0654. This matrix should be updated with each revision that is submitted in order to provide all reviewers with a chronological record of changes that have been affected. This matrix will facilitate quick reference to specific pages and allow reviewers to more readily assess the quality and effect of the changes that have been instituted as the plan and procedures have evolved to their current status. The suggested format is provided in the Attachment 1.

50-322
add: J. Gorn
OCA
DSU3

In addition to the above matrix, FEMA also requests that a narrative description of the reason(s) for each change (i.e., actions, clarifications, etc. in response to FEMA comments, contentions, improvements, minor changes, etc.) be submitted with each revision of the plan and procedures. This narrative description should also be indexed by NUREG-0654 element.

At present, we have a substantial workload associated with operating nuclear reactors which will have to be postponed if FEMA attempts to meet the February 1, 1984, deadline. The Regional Assistance Committee has other agency commitments in addition to the REP work for our Region and cannot devote 100% of their time to Shoreham. As a result of this effort for Shoreham, FEMA/RAC may delay the completion of 44 CFR 350 reports for the operating nuclear reactors in the Region.
