DOCKET NUMBER
PROPOSED RULE PR 50
(60FR9634)

Mr. John C. Hoyle, Acting Secretary
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

Dear Mr. Hoyle:

Subject: Proposed Rule to 10 CFR Part 50, Appendix J,
"Primary Reactor containment Leakage Testing
For Water-Cooled Power Reactors"

The commission published the subject proposed rule for comment in the Federal Register on February 21, 1995 to provide a performance-based option for leakage rate testing of containments of light-water-cooled nuclear power plants.

On behalf of the commercial nuclear industry, Nuclear Energy Institute (NEI) is providing the industry comments on the proposed rule. GPU Nuclear reviewed and fully endorse the industry comments and urges that the NRC promulgate the Option B rule expeditiously.

Sincerely,

John C. Fornicola
Director, Planning & Regulatory
Affairs
