Lisle, Illinois 60532-4351

Re: Reply to a Notice of violation

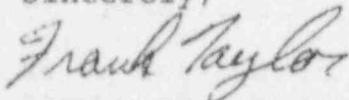

Dear Mr. Jones;

Our reply to the violations are as follows:

1. We have reviewed the radiation protection program content and will continue to do so annually. A record of review has been established. We are in compliance regarding this matter as of this date.
2. A emergency telephone number was added on the date of the inspection while the inspector was here. We were in compliance on the date of the inspection.
3. We have been mistakenly had film badges tested quarterly. However, I am enclosing a copy of the end of the year dosimetry report. As you can see we did not have any measurable radiation for the entire year. We do not use the gauge that frequently. There are months that we do not use the gauge at all. Based on our frequency of use and past dosimetry reports, we would like to request that testing be changed to quarterly.

Please call me if you have any questions or comments. As previously mentioned we are currently in compliance with everything except item 3 and will look forward to your response on that item.

Sincerely,

Frank Taylor P.E.
