

December 1, 1982

Docket Nos. 50-460 & 50-513

Washington Public Power Supply System
ATTN: Mr. G. D. Bouchey, Manager
Nuclear Safety and Licensing
P. O. Box 968, 3000 George Washington Way
Richland, Washington 99352

Gentlemen:

This acknowledges the receipt of your letter dated November 9, 1982 on the subject of the Target Rock Environmental Qualification Testing Program.

You have indicated in your letter that the Supply System is considering the option to upgrade the Target Rock Valve and retest. We appreciate your cooperation and are looking forward to the receipt of the information you plan to forward to this office in this regard.

Sincerely,

R. F. Heishman, Chief
Reactor Construction Programs Branch
Division of Reactor Programs
Office of Inspection and Enforcement

Docket No. 50-513

MEMORANDUM FOR: William D. Miller, Chief
License Fee Management Branch
Office of Administration

FROM: Elinor G. Adensam, Chief
Licensing Branch No. 4
Division of Licensing

SUBJECT: REVIEW COSTS FOR WPPSS's WNP-4 PLANT

The following is provided in response to your three questions relating to the termination of the WNP-4 application of Washington Public Power Supply Systems (WPPSS).

- 1) On March 2, 1982, we responded to their February 1, 1982 letter. A copy of our letter to WPPSS is attached (notice of termination/withdrawal is not anticipated).
- 2) NRC has not currently placed any time limitations on WPPSS accomplishing Phase One. WPPSS will decide, and inform us, when Phase One is terminated (the Construction Permit for WNP-4 expires December 1, 1985).
- 3) We are at present unable to provide you an estimate of NRR and I&E effort to close out WNP-4, and will not have such information until such time as the applicant arrives at a positive conclusion regarding this plant.

Please contact the Project Manager, M. Thadani (X27821) should you have any additional questions.

In your letter of February 3, 1982, to Mr. W. J. Dircks, you discussed the Supply System's intent to maintain the structures and equipment at Washington Nuclear Project (WNP) Nos. 4 and 5 in a licensable condition at least through the period you have termed Phase One and to comply with all existing construction permit conditions and requirements. Our preliminary assessment of this decision does not indicate that any additional near-term action other than that taken or planned is necessary at this time on the part of the Supply System.

It is our understanding that the Supply System intends to carry out the management plan presented to the Region V Office on December 10, 1981, insofar as maintaining the plant equipment and records. The NRC Resident Inspectors and Regional Inspectors intend to conduct their activities (inspection surveillance, audit) on both units in accordance with this plan until such time as the Supply System announces cancellation of phase one.

The staff has ceased its review of the operating license (OL) application for WNP-4 as you requested. We are continuing our acceptance review of the WNP-1 OL application. You should amend the pending application for operating licenses for WNP-1 and WNP-4 to reflect the present status of the WNP-4 project. Because the staff expects to complete its acceptance review for WNP-1 only by mid-March 1982, it may be advisable for you to await the outcome of that review and amend your application to delete WNP-4 at that time. You could then docket and notice the application for an operating license for WNP-1 only. Other aspects of the termination of WNP-4 and WNP-5 could also be addressed at that time.

Sincerely,
